

Compact Espresso Machine with Steam Wand

This compact espresso machine is designed for brewing single or double shots. It features a steam wand for frothing milk, a removable water reservoir, and a drip tray for easy cleaning.

Overview

Professional Espresso Performance

This compact espresso machine is designed for efficiency and ease of use in professional or commercial settings. Featuring a powerful 15-bar pump and a 1250-watt heating system, it ensures optimal extraction for high-quality espresso. The durable construction combines a plastic housing with a sleek stainless steel panel, making it a reliable addition to any coffee station.
