Overview

Compact Excavator Performance

This compact excavator is designed for superior performance and low fuel consumption in confined spaces. It offers a wide operating range and high configuration, making it suitable for diverse tasks from vegetable greenhouse soil loosening to municipal campus greening. With its low investment and high return potential, this machine is an ideal choice for construction, landscaping, and urban demolition projects.

Key Features

Available Accessories

- Auger
- Wood Grab
- Roof
- Ripper
- Rake
- 200mm Narrow Bucket
- 380mm Standard Bucket
- 500mm Leveling Bucket
- 800mm Leveling Bucket
- 900mm Leveling Bucket

Primary Applications

Greenhouse soil loosening, Municipal landscaping, Tree planting, Concrete pavement crushing, Sand-gravel mixing, Narrow space construction
