Overview

Compact Zero Tail Swing Excavator

This high-performance compact excavator is specifically engineered for precision in confined urban environments. It features a zero tail swing radius for enhanced maneuverability and operator safety on busy job sites. Equipped with a robust hydraulic system and a powerful engine, this machine delivers consistent digging force and smooth control for demanding landscaping, utility, and construction tasks.

Performance Metrics

Maximum Digging Force

25.7 KN
Digging Force

Maximum Traction 29 KN

Maximum Gradeability 58 %

Operational Specifications

Operating Hydraulic Pressure 21 Mpa

Travelling Speed 3.5 - 4.5 km/h

Platform Swing Speed 29 KN

Hydraulic System

Hydraulic Pump Capacity

Component	Capacity
