

# Compact Exhaust Fan for Ventilation

This exhaust fan is designed for ventilating enclosed spaces. It features a durable plastic housing and a multi-blade propeller for effective removal of stale air and odors.

## Product Overview

### Compact Ventilation Solution

This compact and efficient exhaust fan is engineered to provide reliable ventilation for enclosed spaces. Featuring a durable plastic housing and a precision-designed multi-blade propeller, it effectively removes stale air and odors to maintain a fresh environment. The unit includes a practical backdraft damper, ensuring air does not re-enter the room when the fan is powered off.

## Technical Specifications

Housing Material	Durable Plastic
Key Features	Compact Design, Multi-blade Propeller, Backdraft Damper

## Applications

### Recommended Environments

- Bathrooms
- Kitchens
- Small to Medium-sized Rooms
