

Compact Fan Heater with Adjustable Settings

This fan heater features two heat settings at 750 and 1500 watts. It includes a four-position switch for off, fan, low, and high settings, along with a power indicator light.

Product Overview

Compact Comfort Heating

The FH-101A is a compact and portable space heating solution designed for efficient personal comfort. It features adjustable thermostat controls and multiple heat settings, allowing for precise temperature management and energy-efficient operation. Equipped with a built-in fan, the unit ensures rapid and even heat distribution, making it an ideal choice for supplemental heating in small to medium-sized rooms.
