

Compact Fluorescent Lamp (CFL)

Compact fluorescent lamps are energy-efficient alternatives to incandescent bulbs. These lamps have a folded or coiled tube to maximize light output and minimize size.

Product Overview

High-Efficiency Compact Fluorescent Lighting

These energy-efficient compact fluorescent lamps (CFLs) serve as a high-performance alternative to traditional incandescent bulbs. Featuring an optimized folded or coiled tube design, they maximize light output while maintaining a compact physical footprint. Ideal for professional environments, these lamps provide a significantly longer operational lifespan and reduced power consumption.
