

Compact Fluorescent Spiral Tube Lamp

This compact fluorescent lamp is an economical and environmentally sound lighting solution. It provides flicker-free, noise-free operation and decreased electricity consumption.

Product Overview

Energy-Efficient Lighting Solution

This compact fluorescent lamp (CFL) serves as a highly efficient alternative to traditional incandescent bulbs. Designed with a distinct spiral tube structure, it maximizes surface area to deliver superior light output while consuming less energy. Its compatibility with standard light sockets makes it a versatile choice for both residential and commercial lighting environments.

Technical Specifications

Lamp Type	Compact Fluorescent Lamp (CFL)
Design Features	Spiral Tube, Energy-Saving, Standard Socket Compatible

Performance

Key Benefits

- Significant energy savings
- Longer lifespan compared to traditional bulbs
- Increased light output via spiral design

Applications

Recommended Applications

Residential Lighting • Commercial Lighting
