

Compact Food Processor with Multiple Attachments

This compact food processor features a clear processing bowl and multiple attachments for slicing, shredding, and chopping. It includes a rotary control dial with settings for off, pulse, and two speed levels.

Product Overview

Versatile Kitchen Performance

This compact food processor is designed to streamline kitchen tasks with its multi-functional capabilities, including doughing, chopping, emulsifying, slicing, and shredding. Featuring a 400W motor and a 500ml processing bowl, it balances power and space-saving design for professional food preparation. The unit offers intuitive control with two speed settings and a pulse function, making it an essential tool for efficient food processing.
