

# Compact Food Vacuum Sealing Machine

This compact vacuum sealing machine is designed for food preservation. It features a user-friendly interface with simple controls for vacuuming and sealing.

## ADDITIONAL IMAGES

## Overview

### Compact Vacuum Sealing Solution

This compact vacuum packaging machine is designed for efficient food preservation and space-saving storage. Utilizing microcomputer program control, it effectively removes air to inhibit bacterial growth and oxidation, extending the shelf life of various items. Its small footprint and energy-efficient heating system make it an ideal choice for both household use and small-scale commercial production.

## Technical Specifications

Input/Output Mode	Forward right output mode
Heating Mode	Fixed instantaneous heating (hot box)
Control System	Microcomputer program control
Component Origin	Taiwan, Japan, South Korea

## Usage & Applications

### Compatible Packaging Materials

- Plastic composite film
- Plastic aluminum foil composite film

### Suitable Items

Solid Foods • Liquid Foods • Powder/Paste • Grains • Fruits • Chemicals • Electronic Components • Precision Instruments • Textiles

### Production Scale

Small batch and medium production
