Product Overview

Compact Electrical Protection

This compact fuse and base assembly is engineered for reliable overcurrent protection in industrial control panels and electrical distribution systems. Designed for 10x38mm fuses, the unit ensures safe operation by cutting off current during circuit faults or abnormal conditions. Its robust housing and secure holder facilitate easy fuse replacement and maintenance, making it an essential component for safeguarding sensitive equipment.

Technical Specifications

Voltage Rating	400 V
Frequency	50/60Hz
Compatible Fuse Size	10x38mm
Standards Compliance	IEC60269-2, EN60269-2, CE
Mounting Type	DIN rail
LED Status Indicator	No

Fuse Characteristics

Fuse Current Rating	2 A
Breaking Capacity	100 kA
Fuse Voltage Rating	500 V
