

Compact Gasoline Engine

This compact and efficient engine is designed for various applications. Its overhead valve (OHV) design ensures optimal power and fuel efficiency.

Overview

Compact Power Solution

This compact and efficient gasoline engine is engineered for reliable performance in a variety of demanding applications. Featuring an overhead valve (OHV) design, the unit optimizes both power output and fuel efficiency for consistent operation. Its durable construction ensures longevity, while the integrated recoil starter allows for dependable, easy start-up in the field.

Technical Specifications

Power Output

5.5 HP

Horsepower

Engine Design

Overhead Valve (OHV)

Starting System

Recoil Starter

Applications

Suitable Applications

- Lawnmowers
- Tillers
- Generators
- General Small Engine Equipment

Features

Key Benefits

Compact Design • Fuel Efficient • Durable Construction • Easy Start-up
