

Compact Gasoline Powered Garden Tiller

This compact tiller is powered by a gasoline engine for effective soil cultivation. Its lightweight design and ergonomic handles ensure ease of use and maneuverability in tight spaces.

Overview

Compact Gasoline Powered Garden Tiller

The 1WG4Q mini-tiller is an efficient agricultural machine engineered for small-scale farming and gardening applications. Featuring a robust gasoline engine and durable tines, it is designed for effective soil cultivation, including seedbed preparation, weeding, and aeration. Its lightweight construction and ergonomic handles ensure superior maneuverability in tight spaces like vegetable patches and small fields.
