

Compact Horizontal Metal Cutting Bandsaw

This compact horizontal bandsaw is engineered for cutting metal with precision. It features an adjustable blade tension, robust frame, and a coolant system to ensure efficient cutting.

Overview

Compact Metal Cutting Solution

The BS-100 is a robust horizontal bandsaw engineered specifically for precision metal cutting in small workshops and fabrication environments. It combines a durable frame with an integrated coolant system to ensure efficient operation and extended blade life. With features like adjustable blade tension and a secure vise system, this machine provides professional-grade accuracy for diverse metalworking tasks.

Performance Metrics

Key Performance Features

1 Integrated

Coolant System

1 Manual

Adjustable Tension

Technical Design

Frame Construction	Robust heavy-duty frame for stability during high-torque cutting
Workpiece Securing	Integrated vise system for secure material positioning
Blade Guide System	Precision blade guides for accurate and straight cuts

Operation & Control

Operator Interface	Dedicated control panel for easy machine operation
Power Source	Equipped with high-performance motor

Applications

Compatible Materials

- Ferrous Metals
- Non-Ferrous Metals
- Structural Steel
- Metal Tubing

Target Environments	Small Workshops, Metal Fabrication Shops, Maintenance Departments
