

Compact Hydraulic Excavator

This hydraulic excavator is a compact and versatile construction machine designed for digging and trenching. Its compact size allows for easy maneuverability in confined spaces, making it suitable for urban construction sites and landscaping projects.

Overview

Compact Hydraulic Excavator

This compact and versatile construction machine is engineered for efficient digging, trenching, and material handling tasks. Designed with a robust hydraulic system and a durable frame, it ensures long-lasting performance in demanding environments. Its compact footprint makes it an ideal solution for urban construction sites and landscaping projects where maneuverability in confined spaces is essential.

Performance Metrics

Operating Weight

7 tons

Operating Weight

Digging Depth	3 m
Bucket Capacity	0.2 m ³

Technical Specifications

Engine Type	Diesel
Compliance	Emission Standards Compliant

Features

Key Features

- Robust hydraulic system
- Comfortable operator cabin
- Compact design for confined spaces
- Durable construction
