

Compact Hydraulic Excavator

This compact excavator is designed for construction and excavation tasks. It features a robust engine, advanced hydraulic system, and ergonomic operator cabin.

Product Overview

Compact Performance Excavator

This 7.5 to 8-ton crawler excavator is engineered for high-efficiency operations in diverse construction environments. It features an advanced load-sensing hydraulic system that ensures precise flow control and energy efficiency. With a reinforced structural design that extends component lifespan by 30%, this machine provides exceptional reliability and adaptability for challenging site conditions.

Technical Specifications

Performance Highlights

30 %

Structural Life Increase

Operating Weight	7.5 ton
Key Features	Load-Sensing Hydraulics, High-Intensity Swing Platform, Energy Efficient, Enhanced Durability

Design and Efficiency

Operational Efficiency

- Advanced load-sensing hydraulic system for complex operations
- Accurate and adjustable flow control
- High-intensity swing platform for increased structural longevity
- Optimized engine power for demanding site conditions
