Overview

Versatile Compact Engineering Solution

This compact hydraulic loader is designed to serve as a multi-functional tool for small-scale construction, landscaping, and indoor material handling. Engineered for high efficiency, a single unit can replace the manual labor of 5-8 workers, making it an ideal choice for short-distance and frequent operations in narrow or confined spaces. The machine supports a wide range of interchangeable attachments, allowing for seamless transitions between tasks like digging, lifting, drilling, and site cleanup.

Operational Capabilities

Performance Highlights

300 types

Available Accessory Functions

8 workers replaced

Labor Efficiency Factor

Compatible Attachments

Bucket, Spiral Drilling Machine, Fork, Four-in-one Bucket, Road Sweeper, Snow Shovel, Hydraulic Drum Mixer

Technical Specifications

Configuration Options

- Track-type propulsion
- Tire-type propulsion
- Variable power configurations
- Customizable accessory packages

Safety Systems

Electric Control System • Hydraulic Drive Safety System

Available Models

- ML526
- ML525
- ML550
- ML530
