

# Compact Internal Combustion Engine

This is a compact internal combustion engine. It is designed for easy starting and reliable performance in demanding conditions.

## Overview

### Compact Power Solution

This compact internal combustion engine is engineered for reliable performance in a variety of small machinery applications, including lawnmowers and portable generators. Featuring a robust single-cylinder design and a protective yellow shroud for enhanced durability, it is built to withstand demanding operating conditions. The integrated recoil starter system ensures quick and easy ignition, making it a dependable choice for professional equipment needs.

## Technical Specifications

### Power Output

**5.5 HP**

Horsepower

Engine Configuration	Single-cylinder internal combustion
Starting System	Recoil starter

## Design & Build

### Included Components

- Carburetor assembly
- Air filter assembly
- Recoil starter mechanism
- Engine block

Housing Features	Yellow protective shroud, Integrated ventilation slots, Compact design
