Product Overview

Compact IPL Hair Removal Solution

This professional-grade IPL hair removal device utilizes advanced xenon quartz lamp technology to deliver effective, long-lasting results. Designed with portability and ease of use in mind, it features a compact form factor and an integrated cooling system that keeps the skin temperature below 10°C during treatment. With adjustable energy levels and a high flash capacity, this device provides a versatile solution for personal hair management.

Technical Specifications

Light Source Technology	Xenon quartz lamp
Total Irradiations	300000
Energy Frequency	4.5 J/cm ²
Wavelength Range	510 nm
Irradiation Area	3 cm ²

Performance Features

Integrated Cooling

Adjustable Energy Gears	5
Light Interval Time	0.8-2s

Power & Environment

Input Voltage	AC100-240V
Output Power	DC12V 4A
Working Temperature	5°C - 30°C
Working Humidity	30% - 60%

Warranty & Support

Warranty

1 Year Warranty
