

Compact Junior Hacksaw for Metal, Plastic, and Wood

This compact hacksaw is designed for cutting metal, plastic and wood. It features a durable steel frame and ergonomic handle for a comfortable grip and adjustable blade tension for precise cuts.

Overview

Compact Junior Hacksaw

This versatile junior hacksaw is engineered for precision and comfort, making it an essential tool for cutting light metal, PVC, and wood. Its design features a durable steel frame that ensures longevity, while the ergonomic soft-grip handle minimizes hand fatigue during extended use. Perfect for both professional tradesmen and hobbyists, this compact saw provides reliable performance for a wide range of DIY and maintenance tasks.
