

Compact Laser Engraving Machine

This compact laser engraving machine is designed for engraving or cutting various materials. It features an adjustable height work area and a control panel for easy operation.

Product Overview

Compact Laser Engraving Solution

This compact laser engraving machine is designed for precision and versatility in small-scale manufacturing and hobbyist applications. Featuring a durable red enclosure with a protective orange viewing window, it ensures user safety while allowing clear monitoring of the engraving process. The adjustable work area accommodates a variety of materials, making it an ideal tool for workshops requiring a space-saving yet capable marking and cutting solution.

Technical Specifications
