

Compact Light-Duty Goods Vehicle

This is a compact, light-duty goods vehicle designed for short-distance transportation. It has an open cargo bed with side rails and dual rear wheels for enhanced stability.

Overview

Compact Light-Duty Transport Solution

This compact, light-duty goods vehicle is specifically engineered for efficient short-distance transportation in both urban and rural environments. Featuring a robust single-cab design and an open cargo bed with side rails, it offers practical utility for moving various goods and materials. The inclusion of dual rear wheels ensures enhanced stability during operation, making it a reliable choice for professional logistics needs.
