

Compact Micro Speaker for Electronic Devices

This compact micro speaker is designed for various electronic applications. Its small form factor makes it suitable for integration into devices where space is limited.

Overview

Compact Micro Speaker for Electronics

The SB-05 is a high-performance micro speaker engineered for seamless integration into space-constrained electronic devices. Its robust construction ensures reliable, consistent audio output across a variety of portable applications. Designed for engineers and system integrators, this component offers easy mounting and clear sound quality for modern mobile hardware.

Technical Specifications

Design & Integration

- Compact micro form factor
- Robust, durable construction
- Easy-mount interface for system integration

Suitable Applications

Mobile Phones, Tablets, Portable Electronic Devices
