

Compact MIG Welding Machines

These compact welding machines are designed for MIG/MAG welding applications. They feature adjustable settings for welding parameters and are suitable for various welding tasks.

Product Overview

Compact MIG/MAG Welding Solutions

This series of compact welding machines is engineered for efficient MIG/MAG welding applications. Designed with portability and versatility in mind, these units feature adjustable settings to accommodate a variety of welding tasks. They provide a reliable solution for professional operators requiring precise control in compact workspaces.

Technical Specifications

Available Models

- MIG 100
- MIG 100F
- MIG 130

Key Features

Compact Design • Adjustable Settings

Welding Process

MIG, MAG
