

Compact Oscillating Space Heater

This is a compact and portable oscillating space heater designed for personal use. It features multiple heat settings controlled by a rotary dial and an oscillator function for widespread heat distribution, along with a safety cut-off switch.

Overview

Compact Personal Comfort

The ZH-250 oscillating space heater is a compact and efficient solution designed specifically for personal heating needs. Featuring versatile heat output control via a simple rotary dial, it allows users to maintain optimal comfort in small office or living spaces. The integrated oscillation function ensures widespread heat distribution, while the built-in safety cut-off switch provides essential protection for peace of mind.
