

Compact Personal Space PTC Heater

This compact PTC heater is designed for personal space heating. It features a rectangular front grill, adjustable temperature and power settings, and a stable base.

Product Overview

Compact Personal Space Heating Solution

This high-efficiency PTC heater provides reliable supplemental warmth for small rooms, offices, and personal workspaces. Engineered with a stable base design for enhanced safety, it helps maintain comfort during colder months. The intuitive dual-knob control system allows users to easily manage both power output and temperature settings for personalized heat distribution.
