

# Compact Pipe Grooving Machine

This pipe grooving machine is designed for creating grooves in pipes with precision. Its compact design and user-friendly operation make it suitable for both on-site and workshop environments.

## Product Overview

### Compact Pipe Grooving Efficiency

This robust pipe grooving machine is engineered for high-precision performance in both workshop and on-site environments. Featuring a powerful hydraulic system, it provides smooth, controlled grooving operations for a variety of pipe sizes and industrial materials. Its compact design makes it a versatile asset for plumbing, HVAC, and large-scale industrial piping projects requiring consistent, high-quality results.

## Technical Specifications

### Core Components

- Pinch roller
- Knurl roller

Machine Model

GC150-BNS

## Ordering Information

### Order Requirement

MOQ Required
