Product Overview

Compact Power Generation Series

This short-body alternator series offers a highly customized and space-efficient power generation solution designed to meet demanding performance requirements. Engineered for versatility, it is ideal for military, mobile vehicle, yacht, and specialized mute unit applications. Its robust design ensures reliable output and optimal integration within compact power systems.

Technical Performance

Available Power Ratings

- 8KW/8KVA
- 12KW/12KVA
- 25KW/25KVA

Rated Speed

1800 RPM

Speed

Operating Characteristics

Characteristic	Value
Phase	Single phase
Poles	Four poles
Frequency	60HZ
Voltage	240V

Application

Primary Applications

Military, Vehicle Power, Mute Units, Yacht Projects
