

Compact PTC Space Heater with Thermal Cut-Off

This compact PTC (Positive Temperature Coefficient) heater is designed for personal space heating. It features a safety thermal cut-off and durable housing, providing rapid and consistent warmth with adjustable settings.

Product Overview

Compact and Efficient Heating

This compact PTC space heater is engineered for rapid and consistent warmth in personal workspaces, small offices, or individual rooms. Utilizing Positive Temperature Coefficient technology, it provides efficient heating while maintaining a quiet operating environment. Safety is prioritized with an integrated thermal cut-off system designed to prevent overheating during use.
