

Compact Quartz Space Heater

This compact quartz heater is designed for personal or small space heating. It features two quartz heating elements protected by a metal safety grill and has a durable plastic housing.

Product Overview

Compact and Efficient Heating

The QH-1000A is a professional-grade compact quartz space heater engineered for reliable and instant warmth in small environments. It utilizes two high-efficiency quartz heating elements protected by a reinforced metal safety grill to ensure both performance and user safety. Its lightweight, portable design and stable base make it an ideal solution for offices, dormitories, or supplementary home heating needs.
