

Compact Refrigerator with Activated Carbon Deodorizer

This refrigerator features a high-efficiency compressor and environmentally friendly, fluorine-free refrigerant. An automatic deodorizer utilizes activated carbon technology to absorb odors.

Product Overview

Compact Refrigeration Excellence

This high-efficiency compact refrigerator features an advanced compressor utilizing R600a fluorine-free refrigerant, ensuring an environmentally friendly and energy-saving operation. Equipped with integrated activated carbon deodorization technology, it effectively eliminates odors to maintain food freshness. The unit is designed for versatility and durability, offering adjustable tempered glass shelving and transparent storage drawers for organized, odor-free preservation.
