

Compact Refrigerator with Adjustable Thermostat

This compact refrigerator has a 128-liter net capacity and a 40-liter freezer capacity. It is equipped with an adjustable thermostat, interior light, and easy-rolling wheels.

Product Overview

Compact Refrigeration Solution

The BCD-128 is a versatile compact refrigerator designed for efficient cooling and space management. It features a net capacity of 128 liters, including a dedicated 40-liter freezer compartment, making it ideal for various professional or commercial settings. Built with environmentally friendly R600a/R134a refrigerants, this unit ensures reliable fresh-keeping while maintaining low energy consumption and quiet operation.
