

Compact Refrigerator with R600a Refrigerant

This refrigerator features a high-efficiency compressor with environmentally friendly R600a refrigerant. It has tempered glass shelves and excellent cold storage door seals with imported insulation materials.

Product Overview

Compact Refrigeration Solution

This high-efficiency compact refrigerator features advanced R600a fluorine-free refrigerant, ensuring an environmentally friendly operation with zero pollution. Designed with ultra-microcellular foaming technology and a seam-free integrally bent cabinet, it provides superior insulation and structural durability. It is engineered for energy efficiency, meeting national level 1 standards while offering reliable performance even in areas with unstable voltage.

Technical Specifications

Energy Efficiency Rating

National Level 1

Available Model Numbers

- BCD-160 LMF
- BCD-140 LMS
- BCD-160 LMS
- BCD-138C LMF
- BC-90 LMF

Refrigerant Type	R600a (Fluorine-free)
------------------	-----------------------

Voltage Design	Wide voltage design
----------------	---------------------

Design & Construction

Cabinet Construction	Integral bending technology (seamless one-piece steel plate)
----------------------	--

Insulation	High-density ultra-microcellular foaming
------------	--

Shelf Material	Tempered Glass
----------------	----------------
