

Compact Refrigerator with R600a Technology

This refrigerator features a fluorine-free compressor for efficient and environmentally friendly operation. It incorporates R600a technology, ensuring safety, energy savings, and reliable performance.

Product Overview

Compact Efficient Cooling

This compact refrigerator utilizes advanced R600a hydrocarbon technology to provide an environmentally friendly and highly efficient cooling solution. Engineered with a wide voltage band design, it maintains reliable performance even in areas with unstable power supply. The high-density, microcellular foaming insulation and anti-vibration damping systems ensure both superior energy efficiency and quiet, seamless operation for professional environments.

Technical Specifications

Refrigerant	R600a Hydrocarbon
Insulation Type	High-density microcellular foam
Voltage Compatibility	Wide voltage band design

Key Features

Shelf Material	Tempered glass
Noise Mitigation	Yes
Interior Lighting	Luxurious uniform temperature control lighting

Model Compatibility

Available Models	AFBCD-159, AY BC-88, AY BCD-132
