

Compact Rice Milling Machine

This compact rice milling machine is designed for efficient grain processing in agricultural settings. It features adjustable settings for desired grain quality and separate outlets for polished rice and byproducts.

Overview

Compact Rice Milling Solution

This compact rice milling machine is specifically engineered for efficient grain processing in small to medium-sized agricultural operations. It features a robust design with a continuous feeding hopper and adjustable milling settings to achieve precise grain quality. Equipped with essential safety features like overload protection and emergency stop functionality, this unit ensures reliable performance while processing various rice varieties.

Performance Metrics

Milling Capacity

200 kg/h

Max Capacity

Power Requirement

7.5 HP

Technical Specifications

Safety Features

- Overload protection
- Emergency stop functionality

Supported Rice Varieties

Long-grain, Medium-grain, Short-grain

Design & Build

Key Machine Features

- Continuous feeding hopper
- Adjustable milling settings
- Separate outlets for rice and bran
- Robust construction
