

# Compact Road Washing Vehicle

This compact road washing vehicle is designed for efficient dust suppression and road cleaning in urban environments. Its compact size allows for maneuverability in narrow streets and confined spaces.

## Overview

### Compact Road Washing Vehicle

This compact road washing vehicle is specifically engineered for efficient dust suppression and road cleaning in dense urban environments. Its agile, compact design allows for superior maneuverability in narrow streets and confined spaces where larger equipment cannot operate. Equipped with a high-pressure water spraying system and a front-mounted spray bar, it provides effective cleaning for municipal maintenance and construction site dust control.

## Technical Specifications

### Cleaning System

- High-pressure water spraying system
- Front-mounted spray bar

Model Designation	FLW5020TYH
-------------------	------------

## Operational Safety

Safety Features	Warning Lights, Reflective Markings
-----------------	-------------------------------------

## Applications

### Primary Applications

Municipal Cleaning • Construction Sites • Urban Dust Control
