

Compact Single-Tub Washing Machine

This compact washing machine is designed for small loads and limited spaces. It features a timer control and durable plastic construction and requires manual filling and draining.

Product Overview

Compact Washing Solution

This compact, single-tub washing machine is an efficient, space-saving solution designed for small loads. Its lightweight and durable construction makes it perfect for environments where space is at a premium, such as apartments, dormitories, or mobile living situations like camping. Featuring simple manual timer controls, it provides a straightforward and reliable washing process for daily needs.
