

Compact Solar Water Heater with Evacuated Tubes

This solar water heater offers good performance at an affordable price point. It uses evacuated tube collectors to efficiently heat water for residential use.

Product Overview

Compact Solar Water Heater

This compact solar water heater utilizes high-efficiency evacuated tube collectors to maximize solar energy absorption for residential hot water needs. The system features a durable stainless steel inner tank and a robust galvanized steel support frame, ensuring long-term reliability in various environments. With advanced polyurethane insulation, it maintains water temperature effectively, providing an efficient and sustainable heating solution.

Technical Specifications

Inner Tank Material	Stainless Steel SUS304-2B
Inner Tank Thickness	0.4 mm
Outer Tank Material	Stainless Steel
Outer Tank Thickness	0.4 mm
Insulation Thickness	55 mm
Insulation Material	Polyurethane

Collector Specifications

Tube External Diameter	58 mm
Tube Length	1.8 m

Construction

Bracket Material	Galvanized Steel
