

Compact Stepping Motor for Precise Positioning

This compact stepping motor is designed for precise angular movement and positioning. It features durable construction and is suitable for applications requiring accurate step control.

Product Overview

Compact Stepping Motor

The WPM35L-048 is a compact stepping motor engineered for high-precision angular movement and accurate positioning. Its durable construction ensures reliable performance in diverse industrial applications requiring meticulous step control. Designed for seamless integration, it features a standard connector interface for quick deployment into existing motion control systems.

Technical Specifications

Model Number	WPM35L-048-001
Motor Type	Stepping Motor
Manufacturing Date	2008-07-24
Step Rating	150

Key Features

Features	Precise Positioning, Compact Design, Standard Connector
----------	---
