

Compact Thermal Imaging Camera

This compact thermal imaging camera is designed for single-handed operation. Its UFPA detector provides clear and accurate thermal images for applications across various industries.

Overview

Compact Thermal Imaging Solution

The MinIR is a compact thermal imaging camera engineered for versatile field applications, including building inspection, electrical troubleshooting, and HVAC diagnostics. Featuring a high-resolution infrared sensor and a wide temperature measurement range, it provides professionals with the accuracy needed for critical analysis. Its lightweight, rugged design ensures durability in demanding environments, while the included user-friendly software facilitates efficient image analysis and reporting.

Technical Specifications

Device Type

Thermal Imaging • Portable • Handheld

Lens Field of View

20°

Applications

Primary Applications

- Building Inspection
- Electrical Troubleshooting
- HVAC Diagnostics
