

Compact Thermoelectric Beverage Refrigerator

This compact refrigerator is designed for cooling beverages and snacks in personal spaces. It features a thermoelectric cooling system, adjustable temperature control, and operates on both AC and DC power.

Overview

Compact Cooling Solution

This compact thermoelectric refrigerator is designed for efficient cooling of beverages and small snacks in tight spaces. Featuring a versatile dual power system, it operates seamlessly on both AC and DC sources, making it suitable for offices, dorms, and vehicles. The durable construction includes a metallic door latch and a removable shelf to help organize your contents effectively.
