Overview

Compact Thermoelectric Dehumidifier

This compact thermoelectric dehumidifier is designed for efficient moisture control in small spaces such as home offices and hotel rooms. Utilizing semiconductor dehumidification technology, it effectively reduces humidity to prevent mold and mildew growth. The unit includes advanced features like an automatic shut-off function when the tank is full, ensuring safe and reliable operation.

Technical Specifications

Capacity	200 ml/day
Rated Voltage	DC12V
Power	55 W
Dimensions	223 x 182 x 155 mm

Features

Safety & Convenience

- Auto shut-off when tank full
- Water full indicator
- Transparent water level indicator

Core Technology

Semiconductor Dehumidification, Thermoelectric Cooling

Air Quality

Air Purification Modules

Photocatalyst Filter • LED UV Lamp • Anion Ionizer

Purification Benefits

- Eliminate odors
- Remove formaldehyde
- Kill bacteria
- Refresh air

Usage

Recommended Applications

Home, Office, Hotel
