

Compact Track Excavator

This compact excavator is designed for digging, trenching, and demolition tasks. It features a hydraulically powered arm with a bucket attachment and is mounted on tracks for stability.

Overview

Compact Performance

This compact track excavator is engineered for precision digging, trenching, and demolition tasks on challenging job sites. Its hydraulically powered arm and bucket attachment deliver reliable force, while the track-mounted design ensures superior stability and maneuverability across diverse terrains. Equipped with a front blade for efficient material leveling, this machine provides an enclosed, operator-focused workspace designed for productivity.

Technical Specifications

Machine Type	Compact Track Excavator
Key Features	Hydraulic Arm, Track-Mounted, Front Blade, Enclosed Cab

Applications

Primary Applications

- Digging
- Trenching
- Demolition
- Material Leveling
