

Compact Tractor with Front-End Loader

This compact tractor is equipped with a front-end loader for agricultural and construction tasks. It features a robust chassis, powerful engine, and hydraulic system for loader operation, along with an operator canopy.

Overview

Compact Tractor with Front-End Loader

This range of compact tractors equipped with front-end loaders is designed for versatile agricultural and construction applications. Available in four power configurations from 25hp to 82hp, these machines offer robust lifting capabilities and precise hydraulic control. Built for efficiency, they feature durable structural designs suitable for small to medium-sized farms and landscaping projects.

Performance Specifications

Technical Specifications by Model

Model	Tractor HP	Structure Weight (kg)	Carrying Capacity (kg)	Lift Height (mm)
LDFT254-QS	25	450	380	1910
LDFT404-QS	40	570	550	2690
LDFT504-QS	50	600	570	2690
LDFT824-QS	82	810	1100	3200

Loader Capabilities

Key Operational Metrics

35 °

Crowd Angle

70 °

Max Dump Angle

150 mm

Max Digging Depth

Bucket Specifications

- Bucket Widths: 1370mm, 1670mm, 2100mm
- Bucket Cubage: 0.2m³ to 0.38m³
