

Compact Travel Electric Kettle

This compact electric kettle is designed for travel, featuring a dual voltage system for international use. It has a 0.5L maximum capacity and includes an automatic shut-off function for safety.

Product Overview

Compact and Reliable Travel Performance

Designed for frequent travelers and small living spaces, this electric kettle combines portability with essential safety features. It features a durable, food-grade plastic body and a convenient dual-voltage system suitable for international use. With its automatic shut-off mechanism and clear water level gauge, it provides a safe, efficient boiling solution on the go.
