

Compact Two-Door Refrigerator

This compact refrigerator is designed for efficient cooling and storage. It features a two-door configuration, adjustable shelves, and a temperature control system.

Product Overview

Compact Cooling Solution

The BCD-94E is a compact refrigerator designed for efficient cooling and storage of food items. Featuring a two-door configuration with separate freezer and refrigerator compartments, it offers adjustable shelves for flexible storage options. Its energy-efficient compressor and insulation make it an ideal choice for small apartments, dorm rooms, or as a secondary unit.
