

Compact Ultrasonic Cleaner for Home Use

This compact ultrasonic cleaner utilizes high-frequency sound waves to create cavitation bubbles in a cleaning solution, effectively removing dirt and grime. It features a stainless steel tank and is suitable for cleaning jewelry, eyeglasses, and dentures.

Product Overview

Compact Ultrasonic Cleaning Solution

This compact ultrasonic cleaner is designed for efficient home use, utilizing high-frequency sound waves to create cavitation bubbles that remove dirt and grime from delicate items. It features a durable stainless steel tank and intuitive microcomputer controls with a default 180-second cleaning cycle. Perfectly suited for optical shops, jewelry stores, and household maintenance, it cleans a variety of items including glasses, jewelry, and electronic components using simple tap water.
