

Compact Ultrasonic Cleaning Device

This ultrasonic cleaning device is designed for cleaning small objects. It utilizes ultrasonic waves in a liquid medium, and includes an internal basket for holding items during the cleaning process.

Product Overview

Compact Ultrasonic Cleaning Device

The SU726 is a specialized ultrasonic cleaning device engineered for the efficient sanitization and maintenance of small precision items. Its compact, ergonomic egg-shaped design makes it ideal for professional and personal use, ensuring thorough cleaning through high-frequency ultrasonic waves. This device is perfectly suited for handling delicate jewelry, watches, and various small hardware components using a liquid cleaning medium.

Technical Specifications

Model Identification	SU726
Design Style	Compact, Egg-shaped
Color Scheme	Blue, White

Usage and Application

Suitable for

- Jewelry
- Watches
- Small precision parts
