Product Overview

Professional Ultrasonic Cleaning Solution

This compact ultrasonic cleaning machine provides an efficient way to restore small items by utilizing high-frequency sound waves. By generating cavitation bubbles in a cleaning solution, the device creates intense energy that safely dislodges dirt and contaminants from intricate surfaces. Its minimalist, compact design makes it an ideal tool for maintaining the cleanliness of jewelry, eyeglasses, dental appliances, and watch bands.

Technical Specifications

Design Features

- Compact rectangular footprint
- Minimalist white aesthetic
- Front-panel power button
- Integrated top-section ventilation

Cleaning Technology

Ultrasonic Cavitation, High-Frequency Waves

Applications

Suitable for Cleaning

Jewelry • Eyeglasses • Watch Bands • Dental Appliances • Small Parts
