Overview

Compact Urban Firefighting Solution

This compact fire fighting truck is engineered for rapid response and high maneuverability in dense urban environments. Built on a 4x2 chassis, it features a 1500L water tank and a powerful roof-mounted water monitor capable of a 20-30 meter range. The vehicle is fully equipped with emergency lighting, sirens, and specialized storage compartments, making it an ideal asset for municipal fire departments requiring agile equipment.

Vehicle Dimensions

Gross Vehicle Weight	4340 kg
Curb Weight	3365 kg
Overall Dimensions	5290 x 1980 x 2610 mm
Wheelbase	2600 mm

Engine & Performance

Engine Specifications

65 hp

Horsepower

2156 ml

Displacement

90 km/h

Max Speed

Emission Standard

Euro 2

Driving Configuration	4x2
