

Compact Utility Vehicle with Flatbed

This compact utility vehicle is designed for diverse applications. Its maneuverability makes it suitable for navigating tight spaces and urban environments, while the flatbed allows for cargo transport.

Overview

Compact Utility Vehicle

This compact utility vehicle is engineered for versatility and efficiency in tight urban environments or confined workspaces. Featuring a practical single-cab design and a functional flatbed, it is optimized for transporting cargo where larger vehicles cannot maneuver. Built with a robust suspension system, it is designed to handle varied terrain while maintaining reliable performance.

Design & Utility

Vehicle Type	Compact Utility Vehicle
Body Style	Single-cab with flatbed
Key Features	Compact Size, High Maneuverability, Flatbed Cargo Area, Robust Suspension

Performance

Terrain Capability

Urban Environments • Tight Spaces • Varied Terrain
